Art Unit: 1616

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to a process of producing a concentrate, classified in class 514, subclass 608.
 - II. Claims 9-12, drawn to a composition, classified in class 514, subclass 608.
 - III. Claims 13-19, drawn to a process for producing a concentrate, classified in class 514, subclass 608.
 - IV. Claims 20-29, drawn to a process for producing a concentrate, classified in class 504, subclass 608.
 - V. Claims 30-60, drawn to a method of using a composition to disinfect, classified in class 514, subclass 608.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product.

Because these inventions are distinct for the reasons given above and the search required for invention II is not required for invention V restriction for examination purposes as indicated is proper.

Art Unit: 1616

3. Inventions I or III or IV and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other and materially different product.

4. Because these inventions are distinct for the reasons given above and the search required for invention I or III or IV is not required for invention II restriction for examination purposes as indicated is proper.

5. Inventions I or III or IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have a different function.

6. Because these inventions are distinct for the reasons given above and the search required for invention I or III or IV is not required for invention V restriction for examination purposes as indicated is proper.

5. Inventions I and III and IV are distinct. Each invention as unique process steps requiring a different search.

Because these inventions are distinct for the reasons given above and the search required for invention I and III or III and IV or I and IV differs restriction for examination purposes as indicated is proper.

A telephone call was made to Attorney Spielman on 7/13/00 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
